

**Interstate 15  
EXPRESS LANES PROJECT  
Southern Extension**

## **Thank you for your comments!**

The I-15 ELPSE scoping period closed on November 22, 2019. The purpose of the scoping period was to inform the public about the proposed project and to solicit input regarding the alternatives being considered and potential impacts.

A total of 152 comments were received during the public scoping period through mail, email, in-person, and online meetings. The comments focused on additional improvements needed along the I-15 corridor, traffic congestion, community development, air quality, noise, and equity of express lanes. Environmental regulations do not require RCTC or Caltrans to prepare responses to comments made during the scoping period, but we are reviewing comments to determine any items or issues that need to be considered during the environmental and engineering studies. As part of this effort, a public scoping summary report, which will include all comments received, is being prepared and will be made available to the public in spring 2020.

The next opportunity for public input in this phase of work will be during public circulation of the draft environmental document, anticipated in 2022.
