

## Construction Update: Weeks of November 16 and 23, 2020

En español

There are no planned closures on I-215 near Placentia Avenue or on East Frontage Road for the weeks of November 16 or 23.

Work will continue along the west and east sides of I-215 and East Frontage Road.

Remember, the construction zone speed limit is 55 mph. Watch for construction vehicles entering and exiting the work area along I-215 and on East Frontage Road.

### Project Progress

Lanes on I-215 have been shifted toward the median near the Placentia Avenue bridge. This provides the space crews need to work on the bridge.

Crews continue to build drainage systems, and a second detention basin is now visible. This work will manage water runoff in the area.

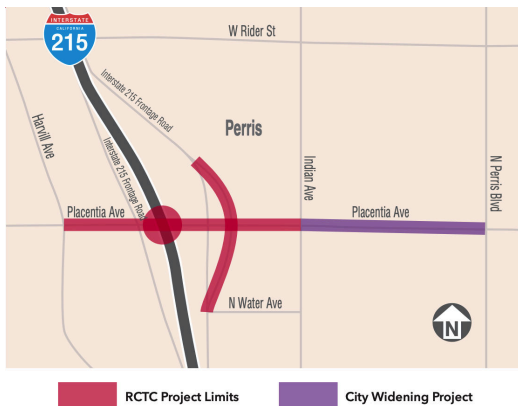

The new alignment of East Frontage Road is also taking shape.

### About the Project

Located between Ramona Expressway to the north and Nuevo Road to the south, the I-215 Placentia Interchange is designed to meet the needs of the area's growing population. The project will add northbound and southbound ramps, realign East Frontage Road, widen the Placentia overcrossing, and add lanes from Harvill Avenue to Indian Avenue. RCTC expects to open the interchange in summer 2022. This interchange is Construction Contract #1 of RCTC's Mid County Parkway Project, which will provide a new 16-mile east-west route between Perris and San Jacinto.
