Special Construction Update: January 6, 2022

New Westbound 91 Lane Open: Green River Road to 241 Toll Road

The new westbound 91 lane opened today at 4 a.m., helping to improve traffic flow through western Riverside County, particularly for commuters who routinely battle morning traffic congestion in the area. The new two-mile, non-tolled lane from the westbound Green River Road on-ramp in Corona to the 241 Toll Road in Anaheim was the centerpiece of RCTC's [91 Corridor Operations Project](#).

Construction began in November 2020 using strategic project staging with financial incentives to the contractor. This allowed RCTC to complete the project quickly and reduce the effects of construction on motorists and neighbors. Watch our video below for closer look at how this project was completed in record time and its benefit to our region.

Partners for the \$29 million investment included the Orange County Transportation Authority, Caltrans, the Transportation Corridor Agencies, and the City of Corona.

Please note additional work will be required to close out the project, including installation of a large overhead sign, which will require an [overnight closure of all lanes](#) on westbound 91 between the 71 and the 241 on Friday, January 7 at 11 p.m. to Saturday at 5 a.m. Please also watch out for future construction updates.

Completing and Opening the 91 COP

SART Temporary Parking

Temporary Santa Ana River Trail Parking Relocation

The parking lot at the Santa Ana River Trailhead near Green River Road will remain temporarily closed for the safety of trail users and construction crews. Please use the upper parking lot at

4740 Green River Road. Do not park at the Green River Golf Club; parking is for club patrons only. The Santa Ana River Trail will remain open during construction, and access to the trail will be provided, although some traffic control measures will be in place. Please do not enter the construction zone near the trailhead.

Project Overview

The Riverside County Transportation Commission, in partnership with Caltrans, the Orange County Transportation Authority, the Transportation Corridor Agencies, and the City of Corona, is building the 91 Corridor Operations Project. The project has added a lane to westbound 91 for approximately two miles between the Green River Road on-ramp and the southbound 241 connector. The new lane, which was built next to the outer shoulder, will help relieve westbound traffic congestion through this heavily traveled corridor.

Please stay connected through construction updates, follow @therctc on social media, and watch for lane closures, narrower lanes, construction crews and equipment, and changing conditions on the 91 and Green River Road. Noisy work also may be required.
