

Interstate 15 INTERIM CORRIDOR OPERATIONS PROJECT

OVERVIEW:

The I-15 Interim Corridor Operations Project was the result of an agency task force led by staff from RCTC, Caltrans, the City of Corona, and the County of Riverside. The group began meeting in June 2021 to study alternatives and develop near-term improvements to help improve traffic operations. The CHP has provided input regarding safety and vehicle pull-over locations.

The project added a non-tolled lane on southbound I-15 from the Cajalco Road on-ramp to the Weirick Road off-ramp, next to the outer shoulder. To add the new lane, crews strengthened the shoulder pavement to handle traffic loads and restripe lanes. The project added one new lane for a total of three 11-foot wide lanes, one 12-foot wide lane, a varying 3 to 8-foot wide outer shoulder, and a varying 2 to 5-foot wide inner shoulder.

Final design and environmental studies were completed and construction began May 2022. The new lane opened July 23, 2022 with project closeout activities continuing through early fall 2022.
