Construction Update and Photos

The Riverside County Transportation Commission, in partnership with Metrolink, began construction of the Moreno Valley/March Field Station Improvements Project in October 2022. Since that time, crews have made significant progress to upgrade the 2.5 miles of track south of the station and have started work on the second train platform. Check out the photos from our hardworking team.

Existing tracks were removed in November 2022 to make room for upgraded tracks suitable for passenger trains.

A construction worker uses a spike puller to remove old spikes from tracks.

Due to heavy rains, crews remediated saturated soils and provided a solid, water-resistant base for new canopy foundations.

Crews pour concrete for existing platform extension retaining wall.

The project is part of Metrolink’s Southern California Optimized Rail Expansion (SCORE) program, which is upgrading the Metrolink system in time for the 2028 Olympics and Paralympics. Funding is provided by federal and local grants and local sources. Questions? Please email [info@rctc.org](mailto:info@rctc.org) or visit [rctc.org/moval](https://rctc.org/moval).
