

# State Route 91 EASTBOUND CORRIDOR OPERATIONS PROJECT

## OVERVIEW:

The Riverside County Transportation Commission, in coordination with Caltrans, the Orange County Transportation Authority, the Transportation Corridor Agencies, and the City of Corona, will add a lane to eastbound 91 between 241 Toll Road and State Route 71 connectors. The new lane is intended to help improve traffic operations on eastbound 91, especially during afternoon and evening hours. Improvements will also include:

- Widening two bridges
- Constructing retaining walls
- Rockfall mitigation measures
- Replacing overhead signs
- A new two-lane exit ramp at Green River Road

The project is currently in the environmental revalidation phase, which is expected to be completed in fall 2026.

RCTC expects to award a Progressive Design-Build (PDB) contract in late 2026 to design and build the project.
